COURSE OBJECTIVES

This course will familiarise you with configuring Dual Check
Safety. You will learn how to create simple safety zones (JOINT
and CARTHESIAN) and user-models. You will also learn how to
implement speed limits and how to deactivate them using safety
inputs. This way you can develop and test safety applications.
Each trainee will have the use of a PC throughout the training.

COURSE CONTENT

- General security
- DCS menu tree
- Safe I/O
- Joint position check
- Joint speed check
- Carthesian position check
- Carthesian speed check
- Creating user models
- Application examples
- Configuration security code

SME PORTFOLIO

FANUC Academy is registered for the SME Portfolio subsidy.
If your company fulfils the conditions, the Flemish Government
will pay 20% or 30% of the net cost of the training course.
