COURSE OBJECTIVES

Familiarise yourself with robots. In this basic course, you will learn how to understand and operate a robot so that you can make best use of it and deal with exceptional situations.

The terminology used will enable you to communicate effectively with other FANUC users and service engineers. The course includes presentations on theory, followed by practical hands-on experience with the robot to reinforce what you have learned. Each trainee will have the use of a FANUC robot throughout the training.

COURSE CONTENT

- Industrial safety according to EN/ISO
- Robot basic settings using the *i*Pendant
- Moving the robot with different JOG coordinate systems
- Set-up of user coordinates
- Setting axis limits and payload
- Creation of basic TPE (Teach Pendant) programs
- Creating program names and editing program heading
- Standard move instructions
- Standard instructions
- Launching programs
- Program-specific troubleshooting
- Basic data backup

SME PORTFOLIO

FANUC Academy is registered for the SME Portfolio subsidy. If your company fulfils the conditions, the Flemish Government will pay 20% or 30% of the net cost of the training course.
